

Common Operational Automation Logic

“तमसो मा ज्योतिर्गमय”, “Oh God lead us from darkness to light”, as the ancient hymn from the Upanishada aims to cleanse the world of darkness, every lump of coal we dig out of the earth just keeps the darkest corner of our nation illuminated, every hearth of our turbine or factory fuelled or flamed.

As we all know that our world and its human civilisation has its long history of coal and its role in catharsis of it from all its gloom, darkness and obscurity, today we see that the same world is reeling under the most fatal spell of CoronaVirus thanks the dark side of Globalisation where disease moves faster than the trade or technology, any deadly menace like COVID-19 moves equally free and furious as its pathogen like man or material. To fight this outbreak of pandemic our Hon'ble Prime Minister Sri Narendra Modi gave a clarion call to the whole nation to follow Janta Curfew on last Sunday followed by the complete lockdown directive from Central and state Govt. for next few days, a self quarantine or home confinement to contain the contagion which already wreaked havoc on the other world and just poise to unleash its chain of catastrophes (human and economic both) on our nation with the slightest laxity or laggardness from our part.

So while pledging our commitment to a full self isolation on these few days to fight the novel Coronavirus (nCoV), the mutated monster microbe decimating thousands across the world, we will love to introduce you to our “COAL (Common Operational Automation Logic),” the ERP newsletter of CIL to make you walkthrough the different nook and cranny of our ERP cum SAP expedition we have taken to automate, informate and transformate our CIL, the coal behemoth of the nation in the coming months.

We believe that similarly as the king coal fights the darkness to light up every corner of our nation, here also in your passive and proactive battle with the spread of this deadly virus, your war against the microbe by obeying your maximum restriction to movement and resolution to maintain days of utmost social distancing by staying at your home this ERP newsletter ‘COAL’ will keep you engaged, enthralled and enlightened by giving you the best companionships in your these days of confinement.

In this Corona Contagion where Confinement is the the only Care we can exercise right now, The Team “COAL” of ERP Newsletter believes that your best Immunity lies in your precise Information.

So stay informed and stay immune.

And happy reading of "COAL" The ERP, CIL Newsletter, Issue-1.
