

Over Burden Measurement Report

Project – PASSION

**Production Planning
Version 1.0**

Designed for

1 Introduction

This document helps understand the custom object developed for Over Burden Measurement report and its reconciliation report.

1.1 Document Objective

Process user will be familiar with following activities.

- OB Measurement
- OB Measurement Report
- OB Measurement Edit/Reversal/Log
- OB Reconciliation Report

2.1 Over Burden Measurement Report (T-code: ZOB_Measurement)

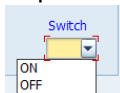

Over Burden Measurement report has 2 switch cases.

- 1) Off Case represents to MCL, WCL and CIL (NEC Mine)
- 2) On Case represents to rest of the subsidiary

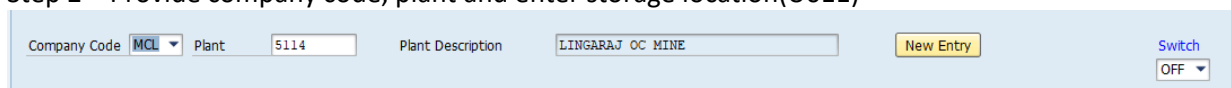

Go to the SAP Easy screen and run the t-code “ZOB_Measurement” and press enter. Below screen appears

Step 1 - Select the switch for which the OB to be measured

Step 2 – Provide company code, plant and enter storage location(U011)

Step 3 – Enter the following fields and make sure to click enter after each field in filled with data,

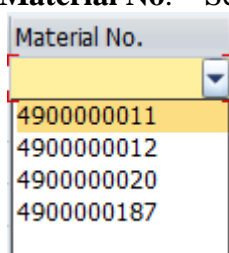

Measurement for the Month – Enter the month for which OB measurement to be done (A validation is kept in place to restrict entry for current month)

Measurement for the Year - Enter the Year for which OB measurement to be done.

Measurement Start Date – Enter the start date of measurement.

Measurement End Date – Enter the end date of measurement.

Material No. – Select the material from the dropdown menu and then click enter.

Process Order – Select the process order using the search option and then click enter to update the values. (only in case of MCL subsidiary)

Production Version – Select the production version using the search option and then click enter to update the values. In case of departmental the vendor code field is greyed out and for hired case the vendor field and Patch/Quarry No/Bench No field needs to be entered by user.

Vendor Agency Code – Select the actual vendor/agency code using the search option and then click enter to update the values.

Patch/Quarry No/Bench No.- Select the actual Patch/Quarry No. from the search option and click on enter. System should display the Reported OB Value.

In case of multiple process orders or Vendor agency codes or Patch/Quarry No., we need to insert multiple number of line items for same.

2.3 OB Reconciliation Report (T-code: ZOB_MEASURED_QTY)

This report displays the date wise with total reported production quantity and total production after measured quantity distributed in pro-rata basis across the whole month for the production days.

The reconcile report will be executed in the back end using batch job by creating variant for respective subsidiary on the days requested by business.

In case user wants to run through the reconciliation report for a particular month, he can run the same using the transaction ZOB_MEASURED_QTY by giving the mine/plant code and period (Month & Year).
